

Net-Centricity & Net Ready
It's More than Information/Data Interoperability

Jack Zavin
Chief, Information Interoper
DoD CIO/A&I Directorate
(703) 607-0238, FAX (703) 6
Jack.Zavin@osd.mil

Interoperability

" The ability of systems, units or forces to provide servic
to and accept services from other systems, units or forc
and use the services to enable them to operate effectiv
together."

Joint Publication 1-02
(emphasis added)

... the right information
... at the right time
... in the right format
... to the right "warfighter"

teroperability is more than just information exchange
it impacts systems, process, procedures,
organizations and missions over the life cycle;
and it must be balanced with Information Assurance

etwork-Centric or Net-Centric?

- **Network implies infrastructure**
- **Net-centric supports non-linear relationships and increased tempo of operations**

ASD(NII)/DoD CIO Vision

Power to the Edge

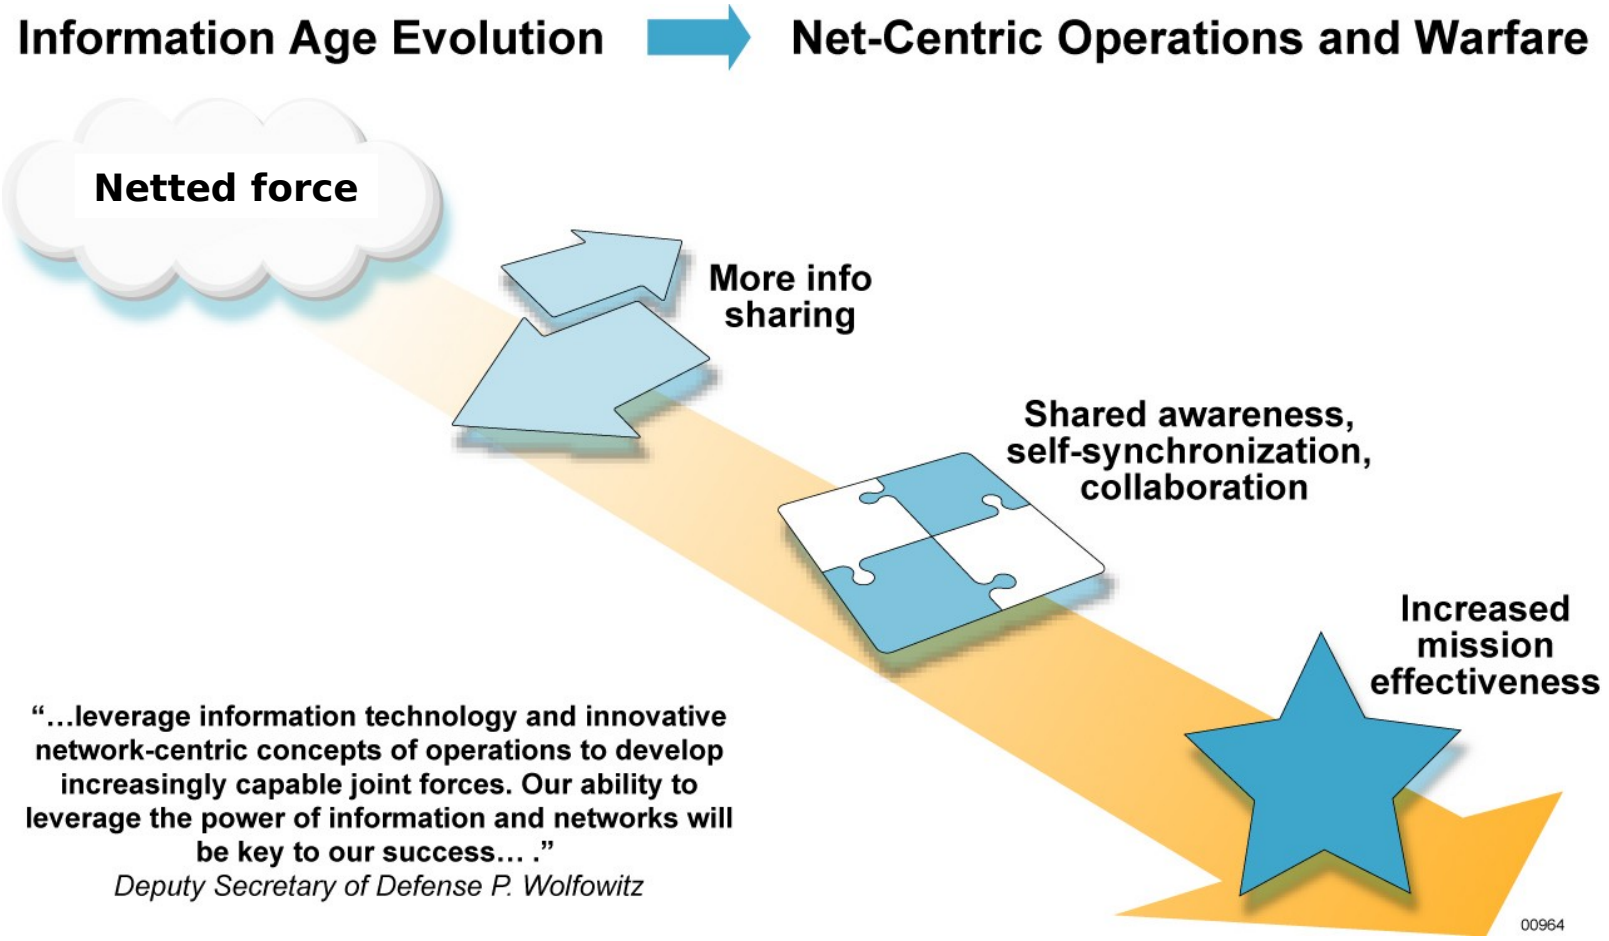
People throughout the trusted, dependable and ubiquitous net are empowered by their ability to access information and recognized for the inputs they provide.

Three goals:

- **Build the net**
- **Populate it**
- **Protect it**

Net-Centric Operations & Warfare
A Transformation Enabler

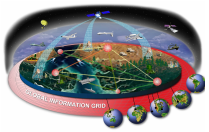
Net-Centricity **is a transformation enabler that empowers all users with the ability to easily discover, access, integrate, correlate and fuse data/information that support their mission objectives.**



"…leverage information technology and innovative network-centric concepts of operations to develop increasingly capable joint forces. Our ability to leverage the power of information and networks will be key to our success… ."

Deputy Secretary of Defense P. Wolfowitz

Future Directions For Defense



Power to the Edge

1. Make information available on a net that people depend on and trust

2. Populate the net with new, dynamic sources of information to defeat the enemy

3. Deny the enemy advantages and exploit weaknesses

Department of Defense Transformation Planning Guidance

April, 2003

"Services will explicitly identify initiatives to improve … adoption of "post before process" intelligence and information concepts, achievement of data level Interoperability; and deployment of "net-ready" nodes of platforms, weapons and forces.

NET CENTRIC ATTRIBUTES

Title	Description	Metric	Source
Internet Protocol (IP)	Data packets routed across network, not switched via dedicated circuits	**IP as the Convergence Layer** Net-Centric Operations and Warfare Reference Model (NCOW RM), Technical View compliant with Joint Technical Architecture (JTA)	NCOW RM, GIG Arch v2, IPv6 Memos (9 Jun 03 and 29 Sep 03), JTA Memo, Nov 24, '03 JTA v6.0
Secure and available communications	Encrypted initially for core network; goal is edge-to-edge encryption and hardened against denial of service	**Black Transport Layer** Transformational Communications Architecture (TCA) compliance; Technical View compliant with JTA	TCA; IA Component of Assured GIG Architecture; JTA Memo, Nov 24, '03 JTA v6.0
Only handle information once (OHIO)	Data posted by authoritative sources and visible, available, usable to accelerate decision making	**Reuse of existing data repositories**	Community of interest policy (TBD)
Post in parallel	Business process owners make their data available on the net as soon as it is created	**Data tagged and posted before processing** NCOW RM Technical View compliant with JTA	NCOW RM, DoD Net-Centric Data Strategy (May 9, '03) JTA Memo, Nov 24, '03 JTA v6.0
Smart pull (vice smart push)	Applications encourage discovery; users can pull data directly from the net or use value-added discovery services	**Data stored in public space is advertised (tagged) for discovery** NCOW RM, Technical View compliant with JTA	NCOW RM; DoD Net-Centric Data Strategy (May 9, '03); JTA Memo Nov 23, '03 JTA v6.0
Data centric	Data separate from applications; apps talk to each other by posting data	**Metadata registered in DoD Metadata Registry** NCOW RM, Technical View compliant with JTA	NCOW RM; DoD Net-Centric Data Strategy (9 May 03); JTA Memo, Nov 24, '03 JTA v6.0
Application diversity	Users can pull multiple apps to access same data or choose same app (e.g., for collaboration)	**Apps posted to net and tagged for discovery** NCOW RM, Technical View compliant with JTA	NCOW RM; JTA Memo, Nov 24, '03 JTA v6.0
Assured Sharing	Trusted accessibility to net resources (data, services, apps, people, collaborative environment, etc.)	**Access assured for authorized users; denied for unauthorized users**	Security/IA policy Nov 21, '03); IA Component of Assured GIG Architecture; JTA Memo, Nov 24, '03 JTA v6.0
Quality of service	Data timeliness, accuracy, completeness, integrity, and ease of use	**Net-ready key performance parameter**	Service level agreements (TBD); JTA Memo, Nov 24, '03 JTA v6.0

A work in process

Net-Centric Data Strategy
Defining the Problem

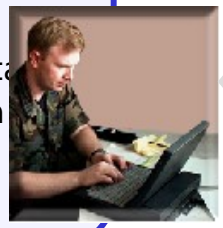
End-User Consumer

"What data exists?"

"How do I access the data"

"How do I know this data what I need?"

"How can I tell someone what data I need?"

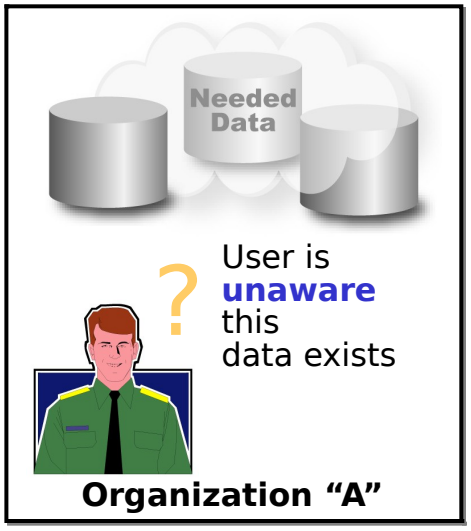


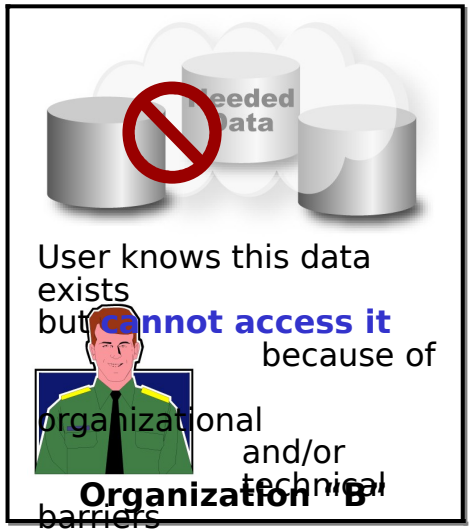
End-User Producer

"How do I share my data with others?"

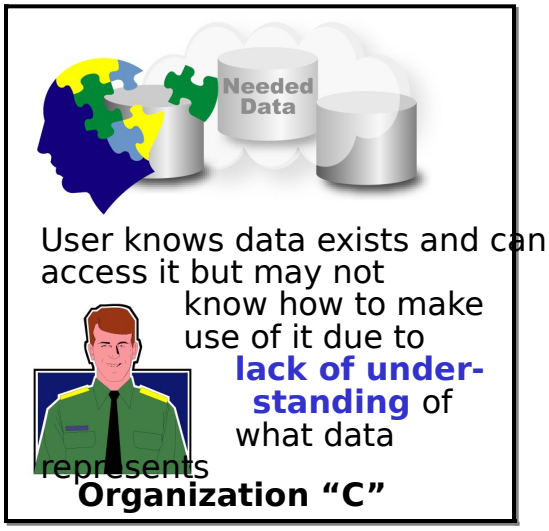
"How do I describe my data so others can understand it?"

BARRIER BARRIER **BARRIER** BARRIER





Needed Data
User knows this data exists but cannot access it because of organizational and/or technical barriers
Organization "B"



Needed Data
User knows data exists and can access it but may not know how to make use of it due to lack of understanding of what data represents
Organization "C"

DoD's Net-Centric Data Strategy

- **The Net-Centric Data Strategy (signed May 9, 2003) is a key enabler of the Department's transformation:**
- **The Strategy provides the foundation for managing the Department's data in a net-centric environment, including:**
  - ✓ **Ensuring data are visible, accessible, and understandable when needed and where needed to accelerate decision making**
  - ✓ **"Tagging" of all data (intelligence, non-intelligence, raw, and processed) with metadata to enable discovery by known and unanticipated users in the Enterprise**
  - ✓ **Posting of all data to shared spaces for users to access except when limited by security, policy, or regulations**
  - ✓ **Organizing around Communities of Interest (COIs) that are supported by Warfighter,**

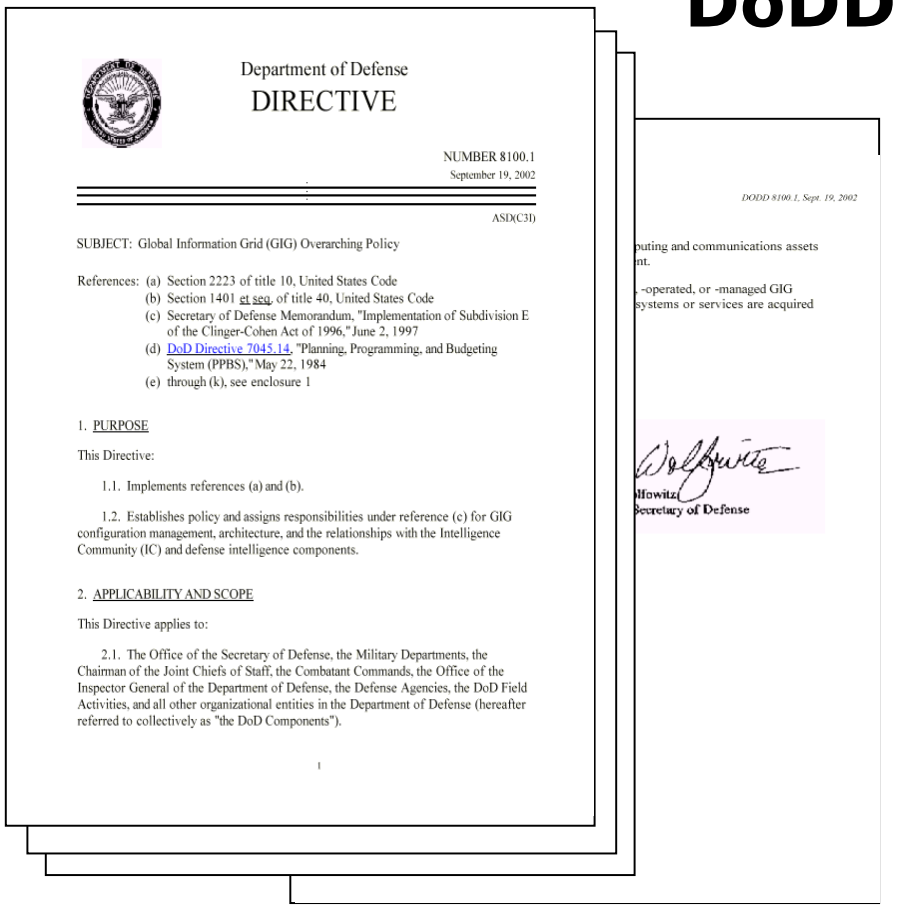
I don't know. It seemed easier when we just went hunting.
Yes, but Og assures me that this will improv our efficiency an keep us ahead o those Cro-Magnons in the valley.

The Global Information Grid

DoDD 8100



Department of Defense

DIRECTIVE

NUMBER 8100.1

September 19, 2002

ASD(C3I)

SUBJECT: Global Information Grid (GIG) Overarching Policy

References: (a) Section 2223 of title 10, United States Code
(b) Section 1401 et seq. of title 40, United States Code
(c) Secretary of Defense Memorandum, "Implementation of Subdivision E of the Clinger-Cohen Act of 1996," June 2, 1997
(d) DoD Directive 7045.14, "Planning, Programming, and Budgeting System (PPBS)," May 22, 1984
(e) through (k), see enclosure 1

1. PURPOSE

This Directive:

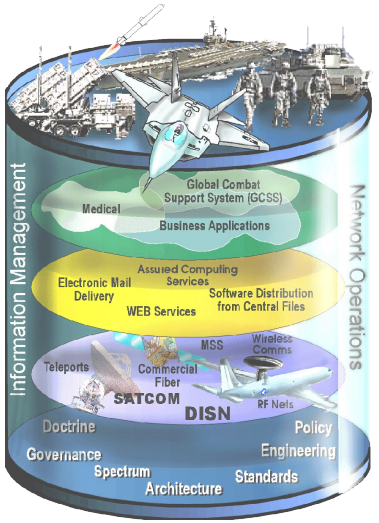
1.1. Implements references (a) and (b).

1.2. Establishes policy and assigns responsibilities under reference (c) for GIG configuration management, architecture, and the relationships with the Intelligence Community (IC) and defense intelligence components.

2. APPLICABILITY AND SCOPE

This Directive applies to:

2.1. The Office of the Secretary of Defense, the Military Departments, the Chairman of the Joint Chiefs of Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities, and all other organizational entities in the Department of Defense (hereafter referred to collectively as "the DoD Components").



The GIG supports all Department of Defense,
National Security and related Intelligence Community missions and functions in war and in peace.

The GIG encompasses the globally interconnected, end-to end set of information capabilities, associated processes and personnel for collecting, posting, distributing and managing information on demand by warfighters,
policy makers and support personnel.

Where we are moving to: The Net-Ready KPP

Net-Ready Key Performance Parameter (NR-KPP). The **NR-KPP assesses information needs, information timeliness, information assurance, and net-enabled attributes** required for information exchange and use. The NR-KPP consists of measurable and testable characteristics and/or performance metrics required for the timely, accurate, and complete exchange and use of information to satisfy information needs for a given capability. The NR-KPP is comprised of the following elements:

- Compliance with the Net-Centric Operations and Warfare (NCOW) Reference Model (RM)
- Compliance with applicable Global Information Grid (GIG) Key Interface Profiles (KIPs)
- Verification of compliance with DoD information assurance requirements
- Supporting integrated architecture products required

Required KPP Attributes

Information needs …

Information timeliness …

Information assurance …

Net-enabled …

- ☑ **Information Needs: A condition or situation requiring knowledge or intelligence derived from received, stored, or processed facts and data.**
- ☑ **Information Timeliness: Occurring at a suitable or appropriate time for a particular condition or situation.**
- ☑ **Information Assurance: Information operations that protect and defend information and information systems by ensuring their availability, integrity, authentication, confidentiality, and non-repudiation.**
- ☑ **Net-Enabled: The continuous ability to interface and interoperate to achieve operationally secure exchanges of information in conformance with enterprise constraints.**

Architecture Products Required to Assess Information Exchange and Use

Information needs … (AV-1, OV-2, OV-4, OV-5, SV-4, SV-5, SV-6)

Information timeliness … (OV-6c, SV-5, SV-6)

Information assurance … (OV-5, SV-4, SV-5, SV-6)

Framework Product	Framework Product Name	General Description
AV-1	Overview and Summary Information	Scope, purpose, intended users, environment depicted, analytical findings
OV-2	Operational Node Connectivity Description	Operational nodes, operational activities performed at each node, connectivity and information exchange needlines between nodes
OV-4	Organizational Relationships Chart	Organizational, role, or other relationships among organizations
OV-5	Operational Activity Model	Operational Activities, relationships among activities, inputs and outputs. Overlays can show cost, performing nodes, or other pertinent information.
OV-6c	Operational Event-Trace Description	One of three products used to describe operational activity sequence and timing - traces actions in a scenario or sequence of events and specifies timing of events
SV-4	Systems Functionality Description	Functions performed by systems and the information flow among system functions
SV-5	Operational Activity to Systems Function Traceability Matrix	Mapping of systems back to operational capabilities or of system functions back to operational activities
SV-6	Systems Data	Provides details of systems data being exchanged between
